CHAMPIONTM
Rescue tools

CHANGE AS EASY AS...

1 Pull the three tethered pins on the tool and remove the cutting head.

2 Slide the desired new head on the tool.

3 Re-insert the three tethered pins. You are ready to go in seconds!

The industry's most versatile and powerful rescue tool just got even more versatile. In addition to the popular standard general purpose "O" cutter and 28" spreader head, Champion now offers a number of new special application attachments for our best-selling BEAST multi-tool. The BEAST is no lackluster combi tool. It is a full size set of tools, all driven by the same powerful drive unit. And with these new accessories, the BEAST gives you the broadest range of capabilities offered on any single tool in the market (or even a complete set of tools for that matter) with specialized blades for U.S.A.R. applications (such as cutting heavy duty frames and supports), plate cutting, tubing (including the new breed of tough new car metals such as boron) and bar stock, rebar, and much, much more. We even offer a new head designed for guillotine cutting where strength and safety are utmost concerns. All blades are laminated for durability and include a bearing and safety tether to ensure smooth and safe operation. All products are made from top quality materials right here in the U.S.A. and each comes with the Champion Lifetime Warranty (with the exception of blades, which are covered by our cost-saving Champion Blade Exchange Program). Attachments are sold individually or as a part of a money saving set.

CHANGE TOOLS IN SECONDS...WITH THESE NEW BEAST ATTACHMENTS

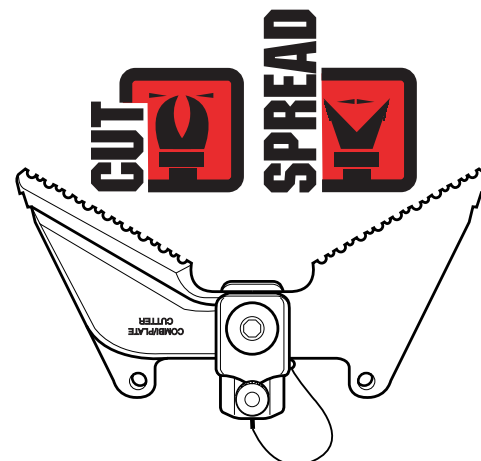

COMBI/PLATE CUTTER

PLATE/SPREADING

- Serrated straight blade designed for slicing through plate and sheet metal
- Curved notch grabs material and keeps it from sliding out when cutting
- Spreader Teeth on Back

"Saw Tooth" straight blade outperforms other plate cutters with curved notch to hold material securely as it slices. Includes aggressive teeth on back edge for quick spreading without changing blades.

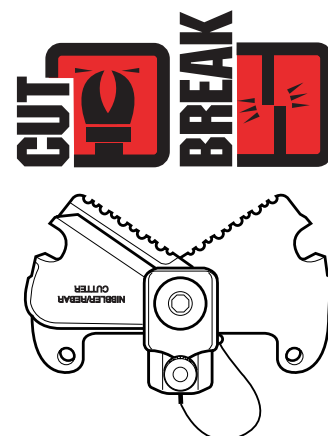

NIBBLER/REBAR CUTTER

SHEET METAL/REBAR

- Small straight beak with serrated teeth makes quick work nibbling through plate and sheet metal
- Top notch easily breaks solid bar, rebar and cables on the reverse stroke

Small straight beak designed to quickly nibble through flat materials.

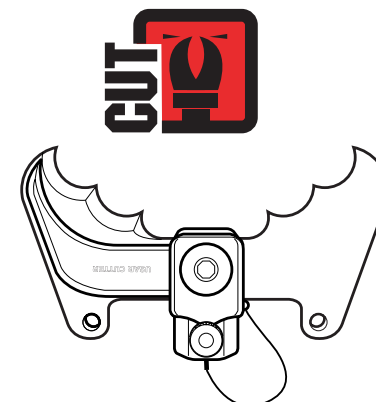

USAR CUTTER

THICK METAL POSTS/BEAMS

- Super aggressive double "O" cutter for extreme urban search and rescue applications
- Cuts through thick steel framing and supports

Extremely strong and versatile cutter designed for the most demanding rescue situations. Super wide notch aggressively grabs materials as reinforced blade cuts through. With piercing tips.

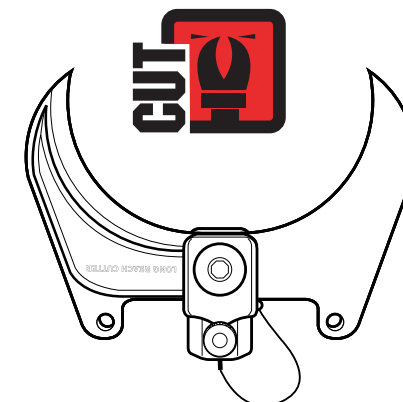

LONG REACH CUTTER

GENERAL PURPOSE

- Extended length "O" cutter designed for reaching in and grabbing materials such as hinges
- Wide, curved opening pulls material into center of blade for maximum cutting power

Extended, super strong blade tips designed to reach into tight spaces and grab/cut obstructions. Perfect for cutting hinges and nader bolts when removing doors, as well as cutting through narrow door posts.

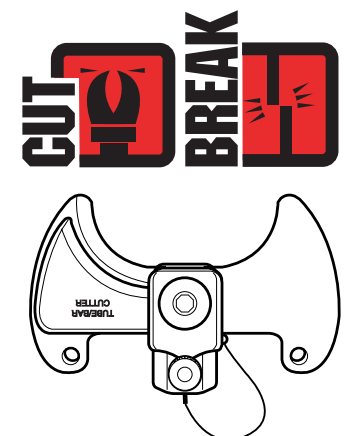

TUBE/BAR CUTTER

TUBING/SOLID BARS

- Small, curved beak delivers the ultimate power for chomping through new types of super strong tubing like boron, or solid stock.
- Opening is wide enough for cutting through new reinforced "A" posts

Small curved beak quickly wraps around the most demanding materials, making quick work of thick wall tubing and solid stock, including materials used in new car applications such as boron. Makes maximum power in the heart of the cut.

GUILLOTINE CUTTER

GENERAL PURPOSE

Complete guillotine cutting head easily attaches by simply installing the three tethered pins

Cradle shaped head keeps patients safe, even when cutting in close proximity

This extremely powerful and versatile cutting head with its unique guillotine design, generates intense cutting force with the minimum amount of energy release and maximum amount of safety. Will cut virtually all new car materials including reinforced posts.

ACCESSORY MOUNTING SYSTEM

NEW!

Everything you need to safely mount a set of BEAST attachments in your rig. Tool Mounting System is fully adjustable and can be mounted horizontally or vertically to virtually any surface using the supplied hardware. Base can be cut to fit unique applications. Includes Mounting Channel, 5 tool (cutter or spreader head) holders, dust covers, and mounting hardware. Extra holders are available (sold separately).

ONLY CHAMPION ADDRESSES CHANGE...

...In the Auto Industry

Today's new 5-star crash rated vehicles made with improved safety features and new, tougher materials provide a safer environment in the event of an accident...but they also require a new breed of rescue tools to get you out.

...In Rescue Tool Requirements

Tools must be able to cut/fracture tougher materials such as boron posts and laminated metal. In general, a tool must generate a minimum of 250,000 lbs. of force to cut into these new materials.

...In How Fast You Can Swap Tools

The new BEAST attachments allow you to change tools (heads) faster than uncoupling and coupling hoses.

...In the Cost it Takes to Acquire and Maintain High Quality Rescue Tools

In the past, you needed to purchase costly tools for each specific extrication function. That might mean spending \$20,000 or more per vehicle to ensure you had a basic complement of tools. From a cost standpoint, this often presented a challenge for rural departments and departments with multiple rescue vehicles and limited budgets. And don't forget maintenance and costs for tool breakage and failure. Other companies charge you for virtually everything. All Champion tools come with a lifetime warranty and our low cost blade exchange program.

Call or write to ask us for a list of departments that are using Champion so you can hear first hand about how our tools perform in the field. Or better yet, request our free DVD of our tools in action, or to schedule a live demo of the entire Champion line of Cutters, Spreaders, Rams, Power Units and Accessories.
